NOJA Power Project Development Manager wins IEEE Outstanding Young Professional Award

*Dr Mehdi Mosadeghy accepts the Outstanding Young Professional Award
(right)*

24 November 2020 – Australian Engineering firm NOJA Power today congratulate their Project Development Manager Dr Mehdi Mosadeghy on winning the Queensland IEEE Outstanding Young Professional Award.

The Outstanding Young Professional Award is presented to exceptional young engineers who have demonstrated significant accomplishments in their career.

Many recipients of this award have gone on to make major contributions to the electrical and computer engineering fields and hold noteworthy positions in academia, industry and government.

Dr Mosadeghy's most recent contributions are the project management of NOJA Power's Synchrophasor [ARENA project](#), Australia's first grid scale deployment of Synchrophasor technology. This project involves multiple stakeholders from Industry, Government and Academia, and recently [won an Australian Engineering Excellence Award](#) in the Queensland division.

"We are proud of our investment in the education of our next generation of engineers through our cadetship and PhD scholarship programs," reports NOJA Power Group Managing Director Neil O'Sullivan, "and the recognition of Dr Mehdi Mosadeghy as an outstanding young engineer by the IEEE Qld Division is both very deserving for Mehdi and satisfying for the company."

NOJA Power Group Managing Director Neil O'Sullivan speech to delegates at the IEEE Queensland Chapter Dinner

The award was presented and celebrated at the 2020 Annual General Meeting of the IEEE Queensland chapter. NOJA Power has long been a supporter of the work of IEEE in Australia, through research and development programs, event sponsorship and partnership with academia.
